

## **VENDOR EXPEDITING SERVICES**

### **Why to Expedite with INSPECTION®?**

With project deadline and schedules being calculated with less and fewer areas for delay of any kind, professional expediting resources became a key a part of winning project completion. The old fashioned approach of beginning the expediting method once the order is already in delay isn't any longer doubtless to lead to timely delivery. Project groups have come back to understand the importance of coming up with expediting activities in conjunction with their inspection activities.

### **RANGE OF EXPEDITING SERVICES**

INSPECTION® is ready to supply comprehensive expediting services ranging from desk / phone expediting through seller visits to full time monitoring and project coverage for the petrochemical and Oil & Gas Industries. We will offer full-fledged and extremely qualified technical staff from an intensive pool of personnel accessible throughout the world. Vary of activities performed / services provided include:

### **DESK/TELEPHONE EXPEDITING**

Desk / phone expediting provides a valuable tool for monitoring the progress of orders with a manufacturer. Contact is established at specific milestones within the order fabrication method and a brief outline of status standing obtained throughout the following conversation. Associate experienced expeditor will very quickly assess whether the order is progressing consistent with plan or whether alternative measures are needed to verify and presumably improve the order progress. Desk / phone expediting is best used as a tool to supplement field expediting. It is additionally a helpful approach of making the vendor aware that delays on the order won't be accepted by their shopper.

## FIRST CLASS EXPEDITING SERVICES BY INSPECTION®

### Field Expediting Services

Field Expediting provides clients with a comprehensive review of the precise standing of their order and any on site action to rectify any potential problem areas. Our expeditors are skilled professionals who, by virtue of their technical backgrounds, ready to ready to quickly verify progress against schedules, spot any potential bottlenecks and indicate any quality problems that will cause ultimate delays. Our expeditors remain in close contact with the client and, where potential, provide a verbal close out decision before effort the works. Throughout this decision the client is briefed on the results of the visit and a discussion concerning continuing activities is additionally held. This ensures that the client has the most recent info on the market and if necessary will update the field expeditor on any changes in project priorities/requirements.
